

Acrylamide-d3

Art. ID TRC-A191302-100MG
Unit 100 mg
Deliverydetails De Minimis UN2074 III E1

Description

Category: Aliphatics, Amines, Electrophoresis Materials, Isotope Labelled Compounds /// Appearance: White to Off-White Solland /// Application Notes: Acrylamide-d3 is deuterium labeled Acrylamide (A191300). Acrylamide is a chemical intermediate in production of polyacrylamides that are use in protein electrophoresis (PAGE), synthesis of dyes and copolymers for contact lenses. It is reasonably anticipated to be a human carcinogen (1,2).
