

Adenosine 5'-Diphosphate

Art. ID TRC-A281765-250MG
Unit 250 mg
Deliverydetails No Dangerous Good /not restricted

Description

Appearance: Off-White Solid /// Application Notes: Adenosine-5'-diphosphate (ADP) is a central component of energy storage, metabolism, and signal transduction in vivo. It serves as a precursor for ATP and, in this capacity, is utilized in a wide number of cellular processes, including respiration, biosynthetic reactions, motility, and cell division. /// References: Knowles, J.R., et al.: Annual Reviews of Biochemistry 49, 877-919 (1980)| Klingenberg, M., et al.: Biochimica et Biophysica Acta, 1778(10), 1978-2021 (2008)|
