

Adiponitrile-d8

Art. ID TRC-A291602-100MG
Unit 100 mg
Deliverydetails No Dangerous Good

Description

Category: Isotope Labelled Compounds, Miscellaneous Reagents /// Appearance: Yellow Oil /// Application Notes: Isotope Labelled Adipodinitrile is used in the preparation of alkyl/arylthiazolines in the efficient synthesis of bacillamide A. Also used in the preparation of arylketones via insertion of nitriles. /// References: Fache, F. et al.: Synth. Comm., 42, 2098 (2012)| Hsieh, J. et al.: Org. Lett., 14, 1282 (2012)|
