

2-Amino-4-chloro-5-fluorobenzoic acid

Art. ID TRC-A603255-1G
Unit 1 g
Deliverydetails No Dangerous Good

Description

Category: Amines, Aromatics, Intermediates /// Application Notes: 2-Amino-4-chloro-5-fluorobenzoic acid is used to synthesize 2-styrylquinazolin-4(3H)-ones, a new class of antimitotic anticancer agents which inhibit tubulin polymerization. /// References: Jiang, J., et al.: J. Med. Chem., 33, 1721 (1990)
