

4-Amino-3-chloropyridine

Art. ID TRC-A603655-50G
Unit 50 g
Deliverydetails No Dangerous Good

Description

Category: Amines, Aromatics, Heterocycles, Intermediates /// Appearance: Light Yellow Solid /// Application Notes: 4-Amino-3-chloropyridine is a chlorinated heteroarylamine. 4-Amino-3-chloropyridine is used in the preparation of inhibitor of phosphodiesterase type 4 (PDE4) as antiasthmatic agents as well as other pyridine based pharmaceutical agents /// References: Ashton, M.J. et al.: J. Med. Chem., 37, 1696 (1994)|
