

6-Amino-4-((3-chloro-4-(pyridin-2-ylmethoxy)phenyl)amino)-7-ethoxyquinoline-3-carbonitrile

Art. ID TRC-A604050-100MG
Unit 100 mg
Deliverydetails No Dangerous Good

Description

Category: Aromatic, Heterocycles, Amines, Pharmaceuticals, Intermediates and Fine Chemicals /// Appearance: Off-White to Pale Yellow Solid /// Application Notes:

6-Amino-4-((3-chloro-4-(pyridin-2-ylmethoxy)phenyl)amino)-7-ethoxyquinoline-3-carbonitrile, is used in the synthetic preparation of aminopropanamides which is used in irreversible inhibition of epidermal growth factor receptor (EGFR) for potential use in cancer therapy. /// References: Carmi, C., et al.: J. Med. Chem., 55, 2251 (2012)
