

2-Amino-1-(4-chlorophenyl)ethanol

Art. ID TRC-A604145-250MG
Unit 250 mg
Deliverydetails No Dangerous Good

Description

Category: Amines, Aromatics, Pharmaceuticals, Intermediates and Fine Chemicals /// Application Notes:
2-Amino-1-(4-chlorophenyl)ethanol is a useful synthetic intermediate in the synthesis of capsaicin analogs which exhibit potential analgesic activity. 2-Amino-1-(4-chlorophenyl)ethanol is also used as a reagent in the synthesis of imidazolyl arylamides as inhibitors of CYP24A1. /// References: Wrigglesworth, R., et al.: J.
