

4-Amino-3,5-dichlorobenzaldehyde

Art. ID TRC-A604595-1G
Unit 1 g
Deliverydetails No Dangerous Good

Description

Application Notes: 4-Amino-3,5-dichlorobenzaldehyde is an impurity of Clenbuterol (C569998, HCl) and is used as a reagent in the synthesis of pyrazolopyridine derivatives as inhibitors of phosphodiesterase-4 (PDE-IV) and production of tumor necrosis factor-alpha (TNF-alpha). 4-Amino-3,5-dichlorobenzaldehyde is also used as a reagent in the synthesis of amino acid derivatives as neuropeptide Y antagonists. /// References: Abe, Y., et al.: U.S. Pat.
