

2-Amino-4,5-dimethylbenzothiazole

Art. ID TRC-A605060-1G
 Unit 1 g
 Deliverydetails No Dangerous Good

Description

Category: Amines, Aromatics, Heterocycles, Miscellaneous Reagents, Sulfur and Selenium Compounds // Application Notes: 2-Amino-4,5-dimethylbenzothiazole is a reagent used in the synthesis of a series of substituted pyrimido[2,1-b]benzothiazoles which exhibit antimicrobial activity. 2-Amino-4,5-dimethylbenzothiazole can also be used as a potential modulator of SKCa, IKCa, and BKCa channels. // References: Gupta, S., et al.: Indian J. Chem. B, 48B, 853 (2009)| Jensen, B.S., et al. Preparation of 2-aminothiazoles as modulators of SKCa, IKCa, and BKCa channels. PCT Int. Appl. WO 2000069838 A1 20001123. Nov 23, 2000
