

2-(2-Aminoethyl)-1-methylpyrrolidine

Art. ID TRC-A609185-50G
Unit 50 g
Deliverydetails No Dangerous Good /not restricted

Description

Category: Amines, Heterocycles, Labeling and Diagnostics Reagents /// Application Notes:

2-(2-Aminoethyl)-1-methylpyrrolidine is used as an electrochemiluminescence probe within microfluidic chip for ECL detection. 2-(2-Aminoethyl)-1-methylpyrrolidine is also used in chemical microarrays to identify ligands that bind pathogenic cells. /// References: Yin, X._B. et al.: J.
