

7-Aminoheptanoic Acid Hydrochloride

Art. ID TRC-A609910-50G
Unit 50 g
Deliverydetails No Dangerous Good

Description

Category: Aliphatics, Amino Acids and Derivatives, Chelating Agents and Ligands /// Appearance: White to Off-White Solid /// Application Notes: 7-Aminoheptanoic Acid is an aliphatic γ -amino acid that acts as a ligand for recombinant kringle 2 domain (residues 180-261) of human tissue-type plasminogen. /// References: De Serrano, V.S. et al.: Arch.
