

N-(6-Aminohexyl)-2-naphthalenesulfonamide Hydrochloride

Art. ID TRC-A611050-250MG
Unit 250 mg
Deliverydetails No Dangerous Good

Description

Category: Inhibitors, Protein Kinase Inhibitors and Activators /// Appearance: Pale Orange Solid /// Application Notes: N-(6-Aminohexyl)-2-naphthalenesulfonamide Hydrochloride is a calmodulin antagonist that binds calmodulin and inhibits calcium ion calmodulin-regulated activities such as phosphodiesterase activation and myosin light chain kinase (1, 2).
