

5-Amino-2-methoxypyridine

Art. ID TRC-A612185-5G
Unit 5 g
Deliverydetails No Dangerous Good /not restricted

Description

Appearance: Dark Red Oil /// Application Notes: 5-Amino-2-methoxypyridine is used as a reagent in the synthesis of a novel series of thienopyrimidines as highly potent and selective PI3K inhibitors. 5-Amino-2-methoxypyridine is also used to synthesize EMPA (E521550), a novel high-affinity selective antagonist for the OX2 receptor. /// References: Han, F., et al.: ACS Med.
