

3-Amino-2-methyl-2-propanol

Art. ID TRC-A617430-10G
Unit 10 g
Deliverydetails No Dangerous Good /not restricted

Description

Category: Amines, Aliphatics /// Appearance: Clear Colourless Oil /// Application Notes:

3-Amino-2-methyl-2-propanol, is a versatile intermediate used for the synthesis of more complex compounds, including inhibitors. It is an intermediate in the preparation of metabolites of Darunavir (D193500), such as (A581405). /// References: Debouck, C., et al.: Drug Dev. Res., 21, 1
