

5-Amino-1-naphthalenesulfonic Acid, 90%

Art. ID TRC-A618355-100G
Unit 100 g
Deliverydetails ADR Limited Quantity (LQ) / AIR Dangerous Good (DG) UN2585 III E1

Description

Category: Amines, Aromatics, Fluorescent Labels and Indicators, Labeling and Diagnostics Reagents, Pharmaceuticals, Intermediates and Fine Chemicals /// Appearance: Dark Purple to Black Solid /// Application Notes: 5-Amino-1-naphthalenesulfonic acid is used in biochemistry as a fluorophore to label nucleotides of interest when running fluorescent immune assays. /// References: Kardost, R., et al.: Mol. Immunol., 19, 159 (1982)| Mulder, B., et al.: Nucleic Acids Res., 33, 4865 (2005)| Fick, J., et al.: Eur. J. Biochem., 126, 367 (1982)
