

## **4-Amino-5-nitro-2-(trifluoromethyl)benzonitrile**

Art. ID TRC-A618545-2.5G  
Unit 2,5 g  
Deliverydetails No Dangerous Good

### Description

Category: Amines, Aromatics, Pharmaceuticals, Intermediates and Fine Chemicals /// Application Notes: 4-Amino-5-nitro-2-(trifluoromethyl)benzonitrile, can be used in the synthesis of substituted benzene-1,2-diamines, which are functional building blocks for the preparation of biologically active heterocyclic molecules, such as, 2,5,6-trisubstitued benzimidazole derivatives as selective androgen receptor modulators (SARMs), /// References: Xun, L., et al.: Org. Proc. Res. Dev., 13, 652 (2009)|
