

2-(2-Aminophenyl)-1H-benzimidazole

Art. ID	TRC-A618790-10G
Unit	10 g
Deliverydetails	No Dangerous Good /not restricted

Description

Appearance: Light Brown Solid /// Application Notes: 2-(2-Aminophenyl)-1H-benzimidazole is a chemical reagent used in the synthesis of small molecule inhibitors targeting ubiquitin-like domains for treatments of diseases caused by the cellular accumulation of damaged proteins. Also used in the synthesis of pharmaceutical agents targeting leishmania related parasites. /// References: Keurulainen, L. et al.: Bioorg. Med. Chem. Lett., 25, 1933 (2015)| He, Y. et al.: Bioorg.
