

(4R)-4-[(4-Aminophenyl)methyl]-2-oxazolidinone Monohydrochloride

Art. ID TRC-A626005-500MG
Unit 500 mg
Deliverydetails No Dangerous Good

Description

Category: Aromatics, Chiral Reagents, Heterocycles /// Application Notes:

(4R)-4-[(4-Aminophenyl)methyl]-2-oxazolidinone Monohydrochloride, can be used for the synthesis of Zolmitriptan (Z639000), a Serotonin 5HT_{1D}-receptor agonist. /// References: Satish Kumar, V., et al.: Synth.
