

Ammonium Glycyrrhizinate

Art. ID TRC-A634010-100G
Unit 100 g
Deliverydetails No Dangerous Good /not restricted

Description

Category: Amines, Aromatics, Miscellaneous Reagents, Pharmaceuticals, Intermediates and Fine Chemicals ///
Appearance: White to Off-White Solid /// Application Notes: Ammonium Glycyrrhizinate is used in the synthesis of polyion complex nanocarriers which may act as a template for the design of other negatively charged water-soluble drugs. Particularly for anti-inflammatory drugs with which Ammonium Glycyrrhizinate is associated. /// References: Zhang, Y. et al.: J. Mat. Chem. Mat. Biol. Med., 1, 1614 (2013)| Paolino, D. et al.: Biomed. Microdev., 9, 421 (2007)|
