

9-Anthracenecarboxylic Acid

Art. ID TRC-A678455-10G
Unit 10 g
Deliverydetails No Dangerous Good /not restricted

Description

Appearance: Yellow Solid /// Application Notes: 9-Anthracenecarboxylic Acid is a chloride channel blocker. It is more suitable than 4,4'-diisothiocyanostilbene-2,2'-disulfonic acid (DIDS) for characterization of calcium-activated chloride current during canine ventricular action potential. /// References: Cherian, O.L., et al.: BBA-Biomembranes, 1848, 1005 (2015)| Vaczi, K., et al.: Naunyn-Schmiedeberg's Arch.
