

2-(Azetidin-1-yl)ethanol

Art. ID TRC-A817600-1G
Unit 1 g
Deliverydetails No Dangerous Good

Description

Application Notes: 2-(Azetidin-1-yl)ethanol is used to prepare novel proline and morpholine derivatives as inhibitors of 11-beta-hydroxysteroid dehydrogenase type 1 (11-beta-hsd-1) for treatment of diabetes and obesity. It is also used in the synthesis of antitumor dibenzonaphthyridine derivatives. /// References: Cheng, H., et al.: PCT Int. Appl. (2005), WO 2005108359 A1 20051117 | Gopalsamy, A., et al.: U.S. Pat.
