

Acarbose-1-phenylthiol Dodeca(p-methoxybenzyl Ether)

Art. ID TRC-A123510-25MG
Unit 25 mg
Deliverydetails No Dangerous Good

Description

Category: Intermediates, Oligosaccharides, Pharmaceuticals, Intermediates and Fine Chemicals /// Appearance: Light Yellow Solid /// Application Notes: Acarbose-1-phenylthiol Dodeca(p-methoxybenzyl Ether) is an intermediate formed in the synthesis of alpha-D-Glucosyl Acarbose Impurity, a homolog of Acarbose (A123500) for use in the treatment of chronic diseases such as inflammatory (including allergic) diseases, metastatic cancers and infection by pathogenic agents including bacteria, viruses or parasites (1,2,3). Acarbose impurity F.
