

## **N-Acetyl-L-Tryptophan**

Art. ID TRC-A168730-5G  
Unit 5 g  
Deliverydetails No Dangerous Good /not restricted

### **Description**

Category: Agonist, Amino Acids and Derivatives /// Application Notes: N-Acetyl-L-Tryptophan, is a derivative of L-Tryptophan (T947210), that can be used as competitive inhibitor to identify and characterize tryptophanases. It can also be used as an NK1 tachykinin receptor antagonist, that may help to develop a novel therapeutic intervention for the treatment of reperfusion injury in acute ischemic stroke. /// References: Turner, R. J., et al.: Neuroscience, 220, 1 (2012)|
