

N-Acetylglycine-d5

Art. ID TRC-A178261-100MG
Unit 100 mg
Deliverydetails No Dangerous Good

Description

Application Notes: N-Acetylglycine-d5 is an isotopic analog of N-Acetyl-glycine (A178260), a derivative of Glycine (G615990). It is an intermediate used to synthesize rac 3-O-Methyl DOPA (M303805) which is an impurity of Levodopa. /// References: Tabar, et al.: Pharmacol. Biochem.
