

N-Acetylloine Hydrochloride

Art. ID TRC-A185055-1MG
Unit 1 mg
Deliverydetails No Dangerous Good

Description

Appearance: White to Off-White Solid /// Application Notes: N-Acetylloine Hydrochloride, is a member of the loline alkaloids, which are naturally occurring insecticidal and insect-deterrant compounds produced in grasses and other plant species. N-Acetylloine was also studied for its potential vasoconstrictive capacity on bovine lateral saphenous veins. /// References: Klotz, J.L., et al.: J. Animal.
