

Organic Contaminants in Non-Smokers Urine (Frozen)

Art. ID	NIST-3673
Unit	5 vials x 10 mL
Deliverydetails	Dry ice shipment /not restricted

Description

This Standard Reference Material (SRM®) is intended for use in evaluating analytical methods for the determination of selected hydroxylated polycyclic aromatic hydrocarbons (hydroxylated PAHs) and phthalate, phenol, and volatile organic compound (VOC) metabolites in urine. All of the constituents for which certified and reference values are provided are naturally present in the urine. A unit of NIST-3672 consists of five vials each containing 10 mL of frozen urine. /// Sample value(s) - please ask for current certificate.
