

1,2-Acenaphthylenedione

Art. ID TRC-A130770-50G
Unit 50 g
Deliverydetails No Dangerous Good /not restricted

Description

Category: Miscellaneous Reagents /// Appearance: Yellow Solid /// Application Notes: 1,2-Acenaphthylenedione is used in the synthesis of AChE inhibitory agents. Also used in the synthesis of turn-on sensors for cysteine/homocysteine and its application in bioimaging. /// References: Zhang, M. et al.: J. Am. Chem. Soc., 129, 10322 (2007)
