

(6alpha)-21-(Acetyloxy)-17-hydroxy-6-methylpregna-1,4,9(11)-triene-3,20-dione

Art. ID TRC-A167600-250MG
Unit 250 mg
Deliverydetails No Dangerous Good

Description

Application Notes: (6alpha)-21-(Acetyloxy)-17-hydroxy-6-methylpregna-1,4,9(11)-triene-3,20-dione is an intermediate in synthesizing 6alpha-Methyl Prednisolone 21-Acetate (M326030), which is used as a glucocorticoid. /// References: Sugihara, N., et al: Am.
