

N-Acetyl Deshydroxymethyl Fingolimod

Art. ID TRC-A168615-5MG
Unit 5 mg
Deliverydetails No Dangerous Good

Description

Application Notes: N-Acetyl Deshydroxymethyl Fingolimod is an impurity of Fingolimod (F805000) which is a fungal metabolite of the Chinese herb Iscaria sinclarii as well as a structural analogue of Sphingosine. N-Acetyl Deshydroxymethyl Fingolimod is also used as a reactant in the synthesis of benzene derivatives as analogs of naturally occurring immunosuppressants. /// References: Fujita, T., et al.: Preparation of benzene derivatives as analogs of naturally occurring immunosuppressants, WO Patent 9606068, Feb 29, 1996]
