

(S)-3-Amino-4-(2,4,5-trifluorophenyl)butanoic Acid Hydrochloride

Art. ID TRC-A168940-100MG
Unit 100 mg
Deliverydetails No Dangerous Good

Description

Application Notes: (S)-3-Amino-4-(2,4,5-trifluorophenyl)butanoic Acid Hydrochloride is used as a reagent in the synthesis of valuable beta-amylalkyl-beta-amino acid enantiomers. /// References: Tasnadi, G., et al.: Org. Biomol. Chem., 8, 793 (2010)
