

2-Acetylcyclohexanone

Art. ID TRC-A172105-50G
Unit 50 g
Deliverydetails No Dangerous Good /not restricted

Description

Category: Miscellaneous Reagents /// Appearance: Yellow Oil /// Application Notes: 2-Acetylcyclohexanone is used in the synthesis of 1-(pyridyl)ethanol derivatives that can reduce keto-esters and ketones. Also used in the synthesis of phenothiazine derivatives that can inhibit protein farnesyltransferase molecules and some that show anti-proliferative activity. /// References: Baciú-Atudosie, L. et al.: Bioorg.
