

2-Acetylnaphthalene

Art. ID TRC-A187210-50G
Unit 50 g
Deliverydetails No Dangerous Good /not restricted

Description

Application Notes: 2-Acetylnaphthalene is an intermediate used to prepare piperidinyl pyrazoles as potent DNA gyrase inhibitors. It is also used in the synthesis of aromatic enone and dienone analogues of curcumin as angiogenesis inhibitors. /// References: Tanitame, A., et al.: J. Med.
