

Adenine Hemisulfate

Art. ID TRC-A280365-100G
Unit 100 g
Deliverydetails No Dangerous Good /not restricted

Description

Application Notes: Adenine Hemisulfate can be one of the factors that influence in vitro growth and shoot multiplication of pomegranate. It can be used in biological study along with varied levels of sucrose, light intensity, and MS medium hydrogen ion concentration where those factors can all significantly influence multiplication and growth of Punica granatum shoots. /// References: Singh, P., & Patel, R., M.: Bioscan, 9, 1031-1035 (2014)
