

S-(5'-Adenosyl)-L-methionine Disulfate Salt (Synthetic) (Mixture of Diastereomers)

Art. ID	TRC-A291530-10MG
Unit	10 mg
Deliverydetails	No Dangerous Good

Description

Category: Amino Acids and Derivatives, Carbohydrates and Derivatives, Nucleotides, Bases and Related Reagents, Sulfur and Selenium Compounds /// Appearance: Off-White to Light Beige Solid /// Application Notes: Methyl donor, cofactor for enzyme-catalyzed methylations, including catechol O-methyltransferase (COMT) and DNA methyltransferases (DNMT). Although present in all cells, it is concentrated in liver where 85% of all methylation reactions occur. It is also involved in regulating liver function, growth, and response to injury. /// References: Friedel, H., et al.: Drugs, 38, 389 (1989), Lu, S., et al.: Int. J. Biochem. Cell Biol., 32, 391 (2000)
