

4-Allyl-2-methoxyphenyl Methanesulfonate

Art. ID TRC-A552535-25MG
Unit 25 mg
Deliverydetails No Dangerous Good

Description

Application Notes: 4-Allyl-2-methoxyphenyl Methanesulfonate is an intermediate in the synthesis of Eugenol (E935640), a dental compound which shows cytotoxicity to human oral squamous cell carcinoma and oral cells. When glucosylated, this compound exhibits anti-inflammatory activity. /// References: Koh, T. et al.: In Vivo, 27, 85 (2013)| Zhang, P. et al.: Arch. Pharm. Res., 36, 109 (2013)|
