

## 4-[4-[(Butylamino)carbonyl]-2-[[[2,4-dichlorophenyl]sulfonyl]amino]phenoxy]-3-methoxy-benzeneacetic Acid

Art. ID TRC-A576555-50MG

Unit 50 mg

Deliverydetails No Dangerous Good

### Description

#### Application Notes:

4-[4-[(Butylamino)carbonyl]-2-[[[2,4-dichlorophenyl]sulfonyl]amino]phenoxy]-3-methoxy-benzeneacetic Acid is a dual prostanoid D receptor (DP) and chemoattractant receptor-homologous molecule expressed on Th2 cells (CRTH2) antagonist. DP and CRTH2 are involved in mediating allergic reactions (asthma, allergic rhinitis, and atopic dermatitis). Compounds that inhibit these receptors may hold potential for treating allergic diseases. /// References: Liu, J., et al.: Bioorg. Med. Chem.
