

2-Amino-4-chloro-6-methoxy-pyrimidine

Art. ID TRC-A603245-50G
Unit 50 g
Deliverydetails No Dangerous Good /not restricted

Description

Category: Amines, Aromatics, Heterocycles, Pharmaceuticals, Intermediates and Fine Chemicals /// Application Notes: 2-Amino-4-chloro-6-methoxy-pyrimidine is one of the two major metabolites formed in the degradation of chlorimuron-ethyl, a pre- and post-emergence herbicide for the control of important broad-leaved weeds in soybean and maize. /// References: Sharma, Seema., et al.: FEMS Microbiol. Lett., 337(1), 18-24 (2012)
