

2-Amino-5-iodo-3-methylbenzoic Acid

Art. ID TRC-A604125-25G
Unit 25 g
Deliverydetails No Dangerous Good

Description

Category: Amines, Aromatics /// Appearance: Brown Solid /// Application Notes: 2-Amino-5-iodo-3-methylbenzoic acid is an intermediate in the synthesis of highly potent and selective activator of insect ryanodine receptors. /// References: Lahm, G. P., et al.: Bioorg. Med. Chem. Lett., 17, 6274 (2007)|
