

12-Aminolauric Acid

Art. ID TRC-A612230-25G
Unit 25 g
Deliverydetails No Dangerous Good /not restricted

Description

Application Notes: 12-Aminolauric Acid is an amino acid used as a reagent in organic synthesis of several compounds including phenylbutazone which is a new long-acting agent which displays improved pharmacokinetics based on human serum albumin as a drug carrier. /// References: Zhou, J., et al.: Chem. Biol. Drug. Des., pages ahead of print (2016)|
