

5-(Aminomethyl)-1-methyl-1H-pyrrole-2-carboxylic Acid

Art. ID TRC-A613075-1G
 Unit 1 g
 Deliverydetails No Dangerous Good

Description

Application Notes: 5-(Aminomethyl)-1-methyl-1H-pyrrole-2-carboxylic Acid is a synthetic reagent, and also a derivative compound of Pyrrole-2-carboxylic Acid (P997890). Pyrrole-2-carboxylic Acid is a reagent used in the synthesis of potent small molecule inhibitors of severe acute respiratory syndrome (SARS) coronavirus. Also used in the synthesis of [2,3-c]pyridine-7-one scaffolds. /// References: Jacobs, J. et al.: 56, 534 (2013)| Nechayev, M. et al.: Mol. Div., 16, 749 (2012)|
