

3-Amino-4-methylbenzoic Acid

Art. ID	TRC-A614090-250G
Unit	250 g
Deliverydetails	No Dangerous Good /not restricted

Description

Category: Amines, Aromatics, Heterocycles /// Appearance: Off-White to Pale Yellow Solid /// Application Notes: 3-Amino-4-methylbenzoic acid is used as a starting material to synthesize cyclopropamitosene compounds, which have potential antitumour activity. 3-Amino-4-methylbenzoic acid also has some partial herbicidal activity. /// References: Jones, G. & Moody, C.: J. Chem. Soc., Perkin Trans., 1, 2455 (1989)| Thomas, G.: J. Agr. Food Chem., 32, 747 (1984)
