

8alpha-Amino-6-methylergoline

Art. ID TRC-A615640-10MG
Unit 10 mg
Deliverydetails No Dangerous Good

Description

Appearance: Very Dark Red-Brown Solid /// Application Notes: 8alpha-Amino-6-methylergoline is an intermediate in the synthesis of trans-Dihydro Lisuride (D449495), an ergot alkaloid derivative that acts as a partial dopamine D2-receptor agonist. /// References: Spies, H., et al.: Bioorg. Med. Chem., 10, 3523 (2002)|
