

4-(4-Aminophenyl)butyric Acid

Art. ID TRC-A622565-2.5G
Unit 2,5 g
Deliverydetails No Dangerous Good /not restricted

Description

Application Notes: 4-(4-Aminophenyl)butyric Acid is a degradation product of Chlorambucil (C325050), an alkylating agent that is used as an chemotherapy drug in the treatment of chronic lymphocytic leukemia. Chlorambucil is also used to treat non-Hodgkin's lymphoma (NHL) and Hodgkin's disease. /// References: Chang, S.Y., et al.: J. Pharm. Sci., 69, 80 (1980)| Coglia, A., et al.: Leuk.
