

3-Aminopropionitrile Fumarate (2:1)

Art. ID TRC-A628190-100G
Unit 100 g
Deliverydetails No Dangerous Good /not restricted

Description

Category: Miscellaneous Reagents /// Application Notes: In mammals, metabolism of 3-aminopropionitrile leads to release of cyanide ions. Metabolic activity is localized in the microsomal fraction of the liver, and is believed to proceed through a free-radical pathway. /// References: Fernandez, G., et al.: Vet. Human Toxicol., 33, 321 (1991)
