

4-(2-Aminopropyl)-2-methyl-phenol Hydrobromide

Art. ID	TRC-A628705-5MG
Unit	5 mg
Deliverydetails	No Dangerous Good

Description

Appearance: Gray Solid /// Application Notes: 4-(2-Aminopropyl)-2-methyl-phenol Hydrobromide is an intermediate in synthesizing (1RS)-1-(3,5-Dihydroxyphenyl)2-[[[(1RS)-2-(4-hydroxy-3-methylphenyl)-1-methylethyl]aminoethanol Hydrobromide (D453355), which is an impurity of Fenoterol Hydrobromide (F248850), a beta2-adrenergic agonist. Also a bronchodilator and tocolytic. /// References: Schuster, B., et al. *Arzneim.-Forsch.*, 19, 1905 (1969)| Gerris, J., et al.: *Eur. J. Clin.
