

2-Aminobenzotrifluoride

Art. ID TRC-A630765-25G
Unit 25 g
Deliverydetails ADR Excepted Quantity (EQ) / AIR Excepted Quantity (EQ) UN2942 III

Description

Category: Amines, Aromatics /// Appearance: Liquid /// Application Notes: 2-Aminobenzotrifluoride is used as a reagent to synthesize thiohydrazides that act as effective antibacterial remedies for chlamydia.

2-Aminobenzotrifluoride is also used as a reagent to synthesize substituted 2-benzothiazolamines which have anticonvulsant activity. /// References: Hays, S., et al.: J. Pharm. Sci., 83, 1425 (1994) | Yarovenko, V., et al.: J. Chem. Chemical Eng., 4, 55 (2010)
