

2,6-Anhydro-5-deoxy-D-lyxo-hex-5-enonic Acid Methyl Ester 3,4-Diacetate

Art. ID TRC-A638200-100MG
Unit 100 mg
Deliverydetails No Dangerous Good

Description

Application Notes: 2,6-Anhydro-5-deoxy-D-lyxo-hex-5-enonic Acid Methyl Ester 3,4-Diacetate is used as a reagent in the synthesis of the nucleoside antibiotic Herbicidin B. It is also a useful synthetic intermediate in the synthesis of Mirtazapine N-Glucuronide (M365015). /// References: Ichikawa, S., et al.: J. Am. Chem. Soc., 121, 10270 (1999)
