

Arachidonoyl Chloride

Art. ID TRC-A765155-500MG
Unit 500 mg
Deliverydetails No Dangerous Good

Description

Application Notes: Arachidonoyl Chloride is a derivative of Arachidonic Acid (A765000), an essential fatty acid and a precursor in the biosynthesis of prostaglandins, thromboxanes, and leukotrienes. Arachidonic Acid occurs in liver, brain, glandular organs, depot fats of animals, in small amounts in human depot fats, and is also a constituent of animal phosphatides. /// References: Kurosawa, T., et al.: J.
