

3-[(Aminocarbonyl)amino]-5-[4-(4-morpholinylmethyl)phenyl]-2-thiophenecarboxamide

Art. ID	TRC-A794800-10MG
Unit	10 mg
Deliverydetails	No Dangerous Good

Description

Category: Aromatics, Heterocycles, Pharmaceuticals, Intermediates and Fine Chemicals, Protein Kinase Inhibitors and Activators, Sulfur and Selenium Compounds /// Appearance: Pale Yellow Solid /// Application Notes:

3-[(Aminocarbonyl)amino]-5-[4-(4-morpholinylmethyl)phenyl]-2-thiophenecarboxamide is a transforming growth factor (TGF)-beta-activated kinase 1 (TAK-1) inhibitor.

3-[(Aminocarbonyl)amino]-5-[4-(4-morpholinylmethyl)phenyl]-2-thiophenecarboxamide has potential use in the treatment of certain lymphomas that are particularly susceptible to TAK1 inhibitors such as B cell tumors, solid tumors, or T cell leukemias.
