

(2beta,3alpha,5alpha,16beta,17beta)-17-Acetoxy-3-hydroxy-2-(4-morpholinyl)-16-(1-pyrrolidinyl)androstane

Art. ID TRC-A165650-250MG
Unit 250 mg
Deliverydetails No Dangerous Good

Description

Category: Metabolites and Impurities, Miscellaneous Reagents, Pharmaceuticals, Intermediates and Fine Chemicals, Steroids /// Appearance: Off-White to Pale Beige Solid /// Application Notes: (2beta,3alpha,5alpha,16beta,17beta)-17-Acetoxy-3-hydroxy-2-(4-morpholinyl)-16-(1-pyrrolidinyl)androstane (Rocuronium EP Impurity A) is a compound is used in the synthesis of the neuromuscular blocking agent rocuronium bromide. /// References: Srinivasan, N. et al.: Orient. J. Chem., 24, 989 (2008)|
